Ordinance #268, adopted by the Board, now gives you the option to have your septic hauler inspect your tank and system in lieu of the Amity Twp Sewage Enforcement Officer (SEO). A fee of \$40 is required for this option as opposed to \$65 for the Amity Twp SEO to inspect your system. The septic hauler driver doing the inspection **must be certified** by the Pennsylvania Septage Management Association (PSMA). If he is certified, and you choose this option, it is the **responsibility of the property owner**, upon completion of all data on the report card, to submit this report card to Amity Township, to meet the requirements of the Sewage Management Ordinance.

Please be aware that per DEP regulations, **ALL** repairs and modifications to an existing on-lot sewage disposal system require a permit. Permit applications are available at the Amity Township office and must be submitted to the Amity Township Code Clerk at 2004 Weavertown Road, Douglassville, Pa 19518.

Thank You
