There are two (2) options. #1 When you choose to have the Twp SEO perform the maintenance inspection there is a \$75 Twp administration/inspection fee. #2 When you choose to have a PSMA certified INSPECTOR perform the maintenance inspection there is a \$40 Twp administration fee. Should you choose #2 to have the septic hauler driver do the inspection, the driver **must be certified** as an inspector by the Pennsylvania Septage Management Association (PSMA). If he is certified, and you choose this option, it is the **responsibility of the property owner**, upon completion of all data on the report card, to submit this report card to Amity Township along with the required fee, to meet the requirements of the Sewage Management Ordinance.

Please be aware that per DEP regulations, <u>ALL</u> repairs and modifications to an existing on-lot sewage disposal system require a permit. Permit applications are available at the Amity Township office and must be submitted to the Amity Township at 2004 Weavertown Road, Douglassville, Pa 19518. Please make checks payable to: **Amity Township**

Thank You
